

Philippine Sugarcane Field Test Report

BIO LINK Organic Foliar Fertilizer
Efficacy Validation and
Strategic Market Outlook

CLIENT REPORT
2023

Field Test Exceeds Expectations: Perfectly Aligned with the Philippine Organic Transition

Superior Field Efficacy

Sugarcane germination time drastically reduced from the standard 15 days to 8-10 days, demonstrating powerful growth momentum.

Macro Policy Tailwinds

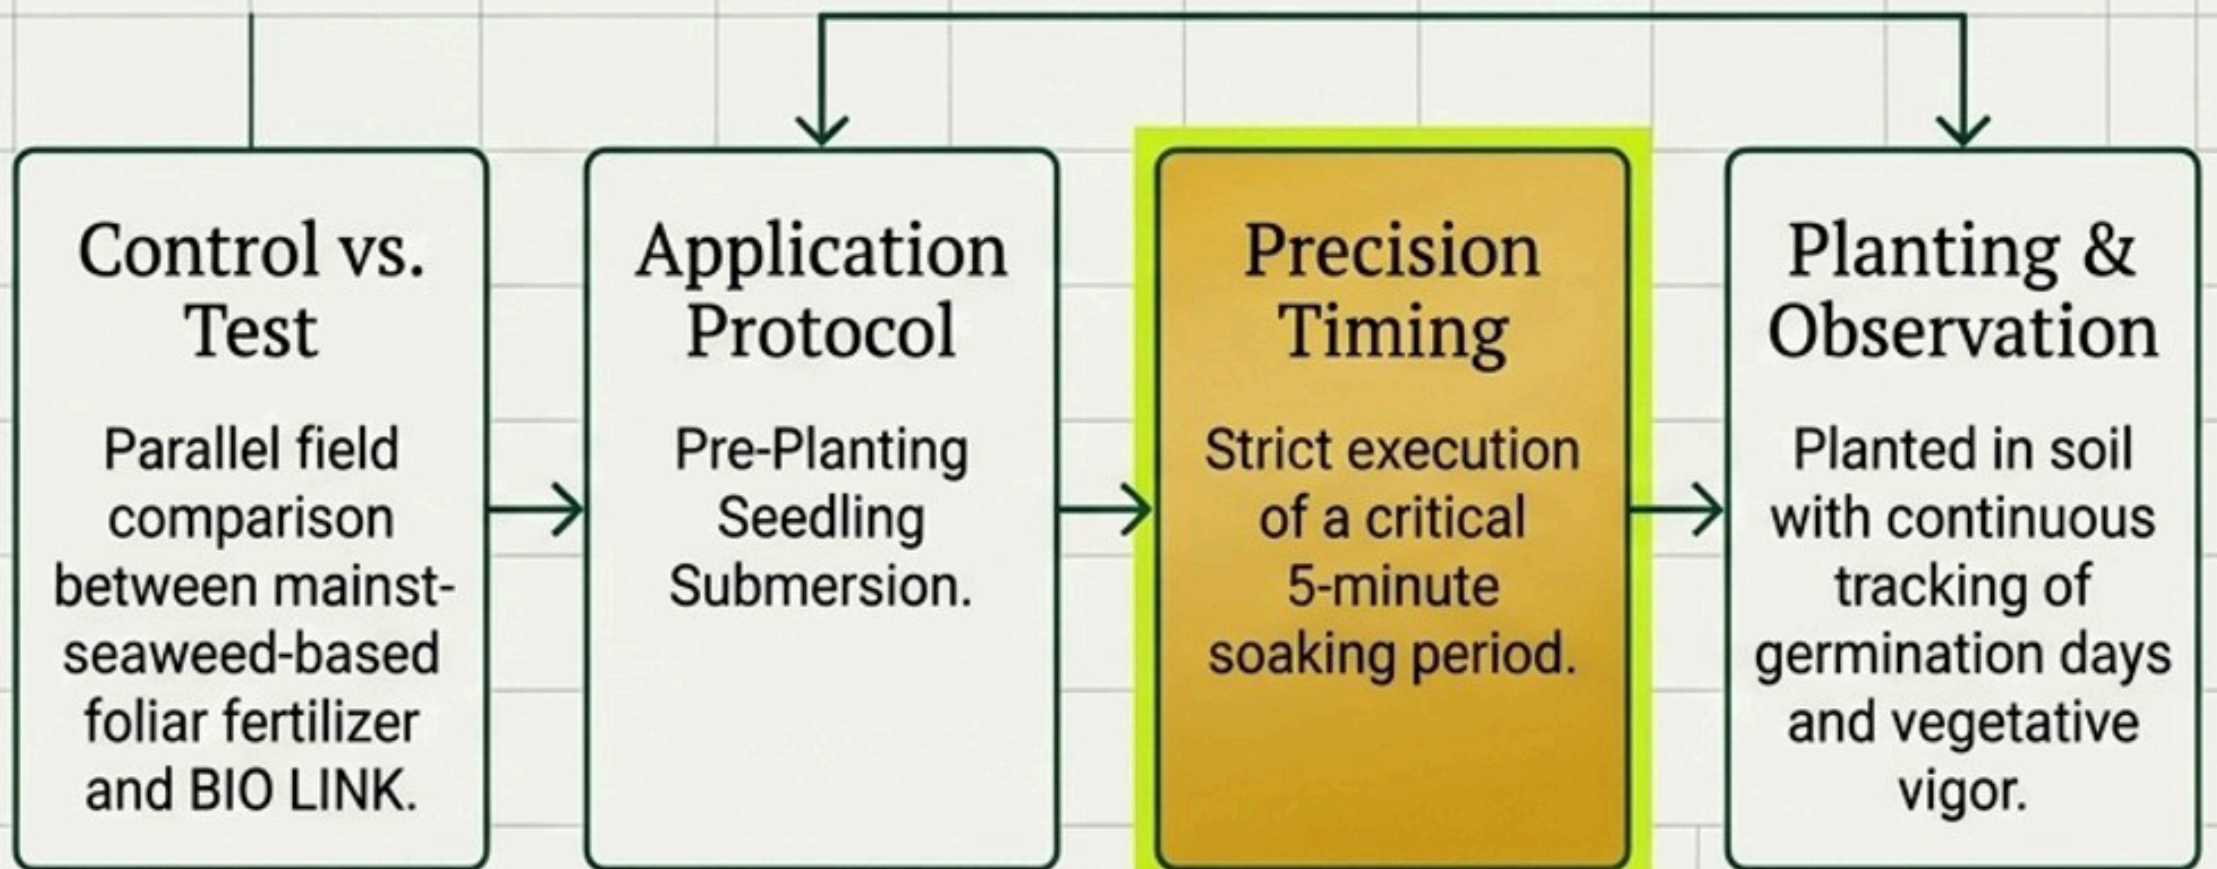

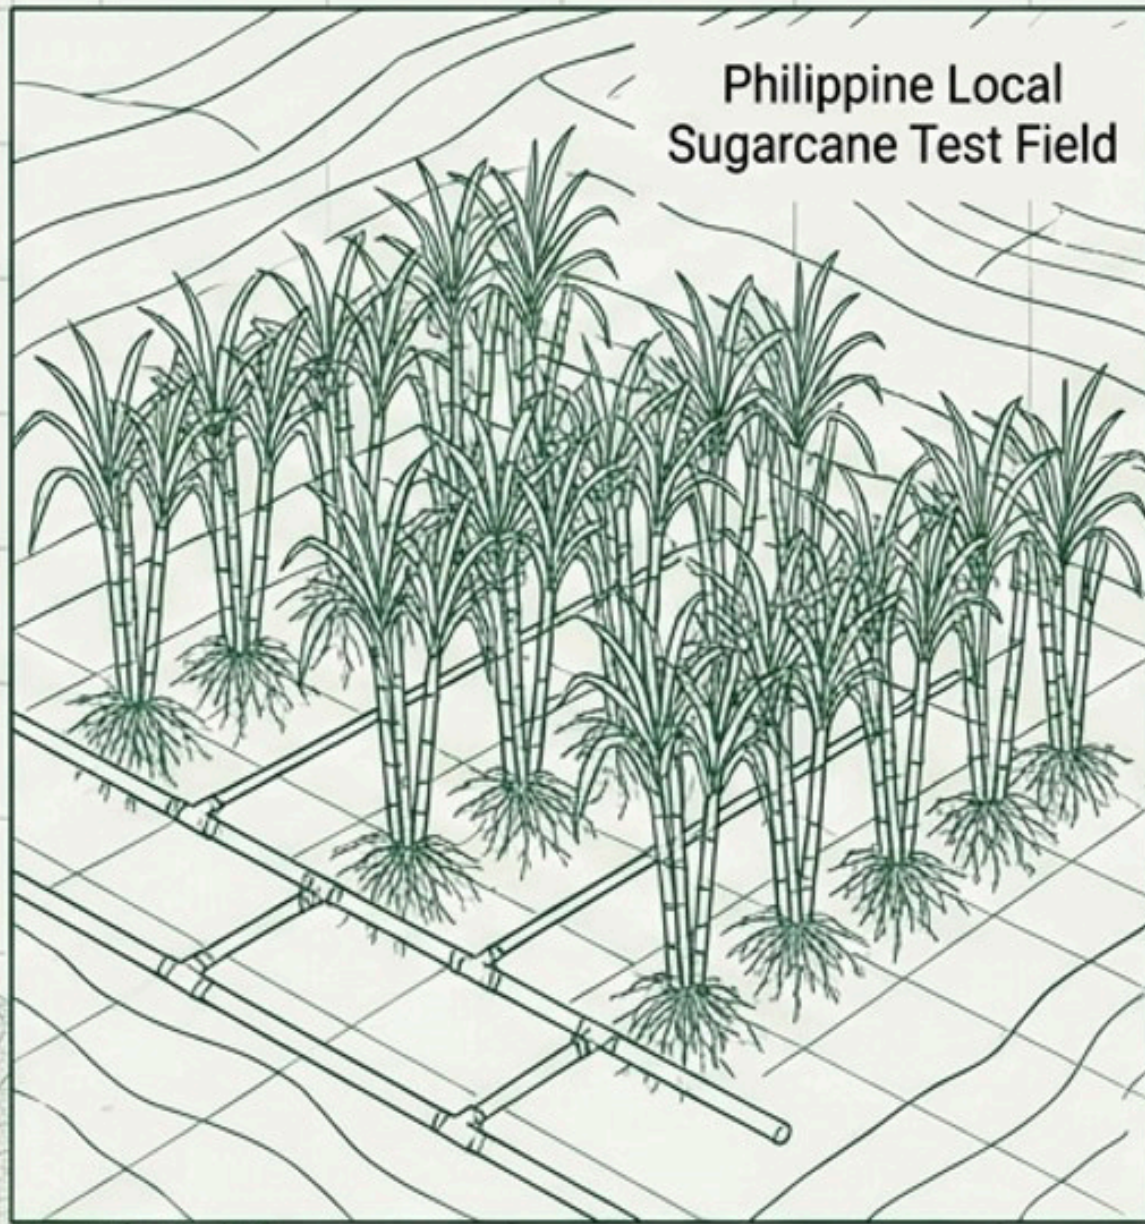

National and local governments are aggressively driving an organic agriculture transition, creating explosive demand for high-efficiency organic fertilizers.

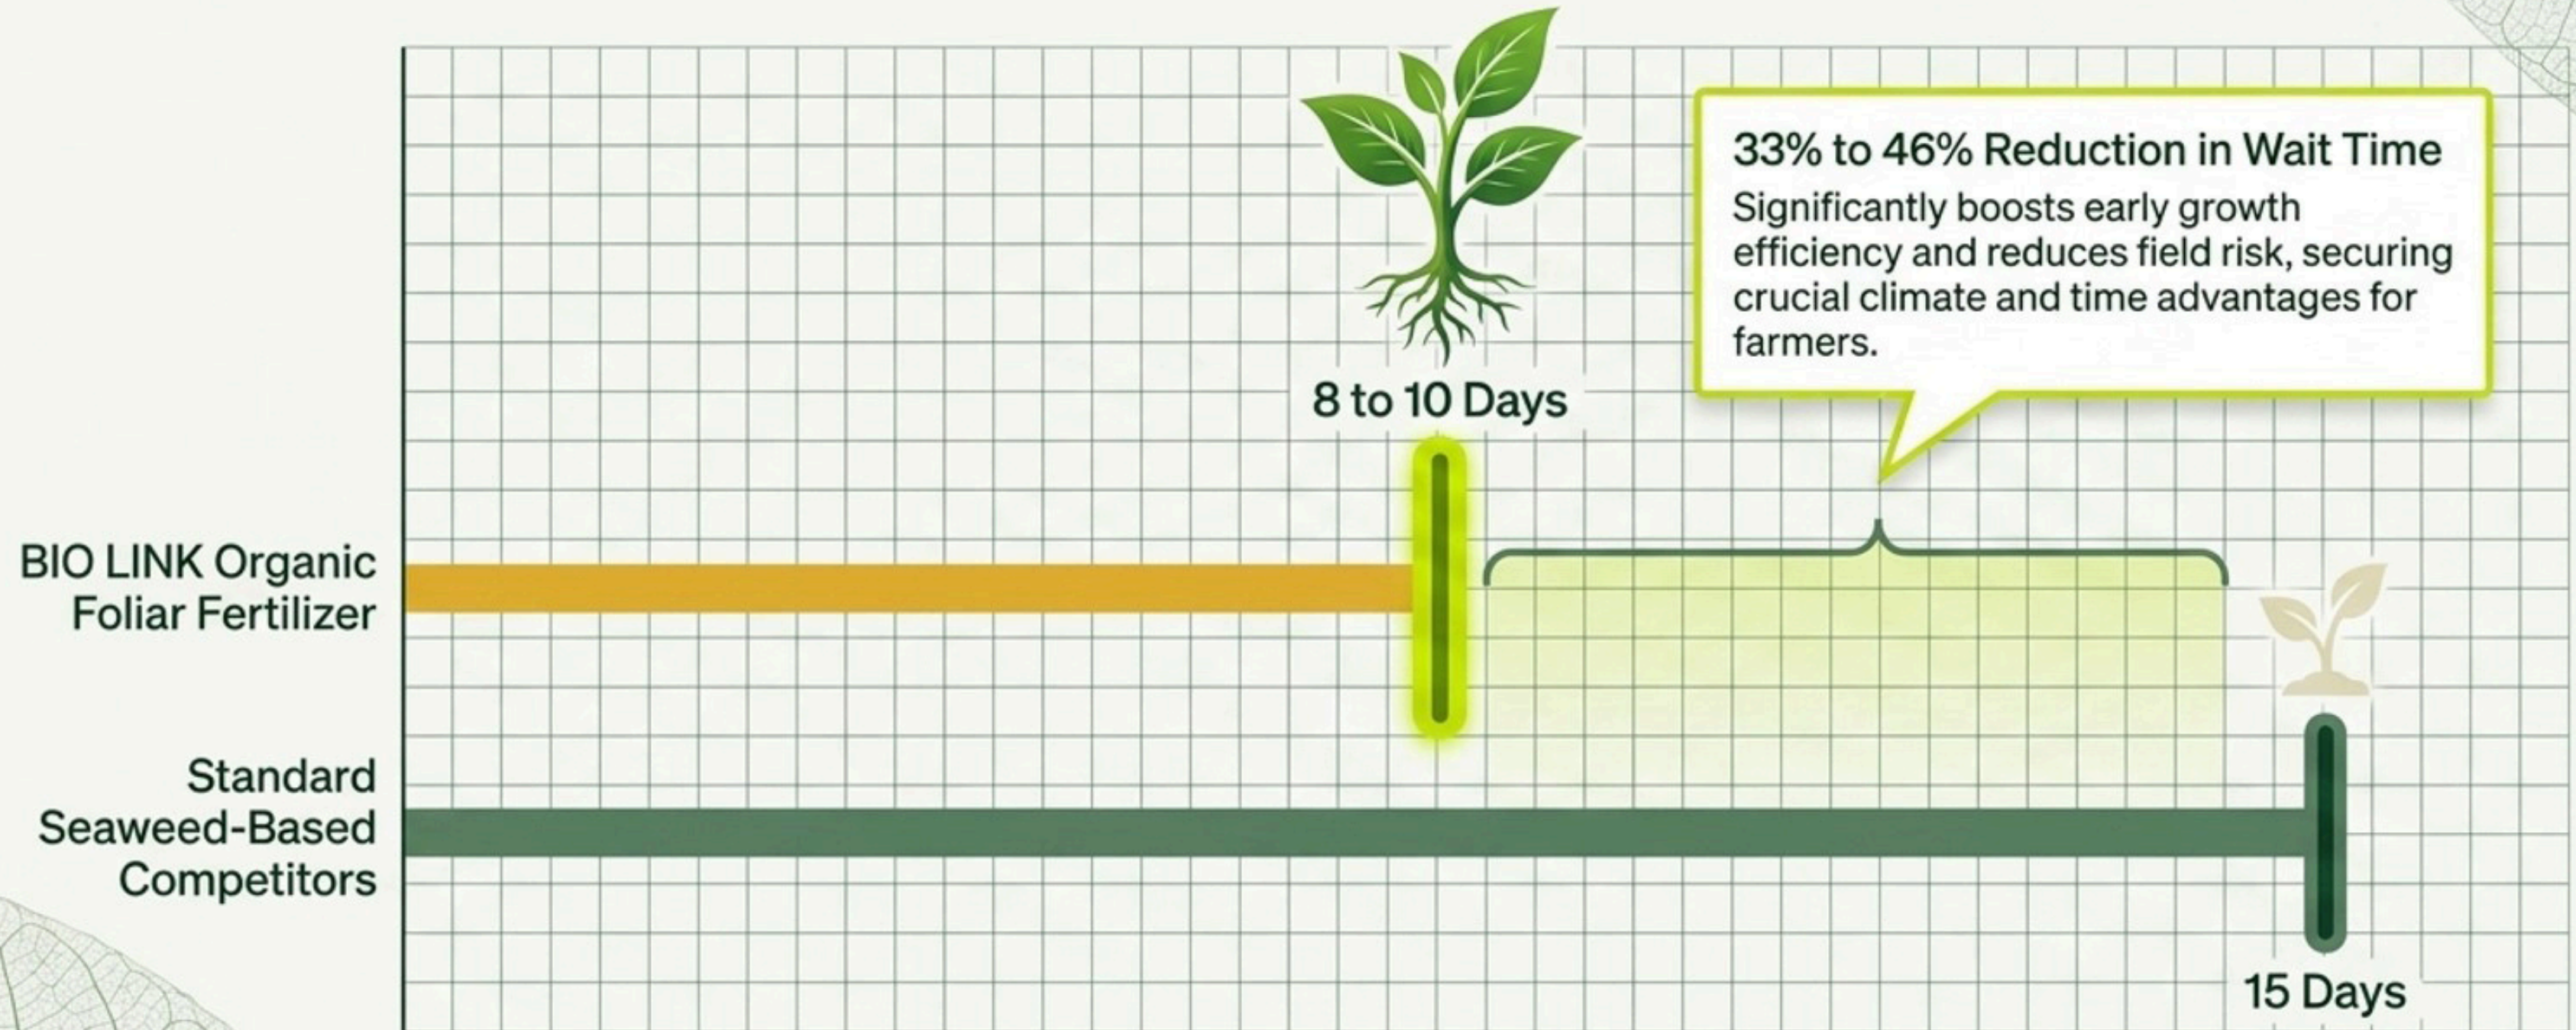

High Commercial Conversion

Product advantages perfectly overlap with policy direction. Local partners show strong willingness and confidence in introducing BIO LINK.

Field Test Parameters: 5-Minute Submersion Control Experiment

Accelerated Germination: Breaking the Growth Cycle Limits of Traditional Seaweed Fertilizer

BIO LINK

Comprehensive Efficacy Scorecard

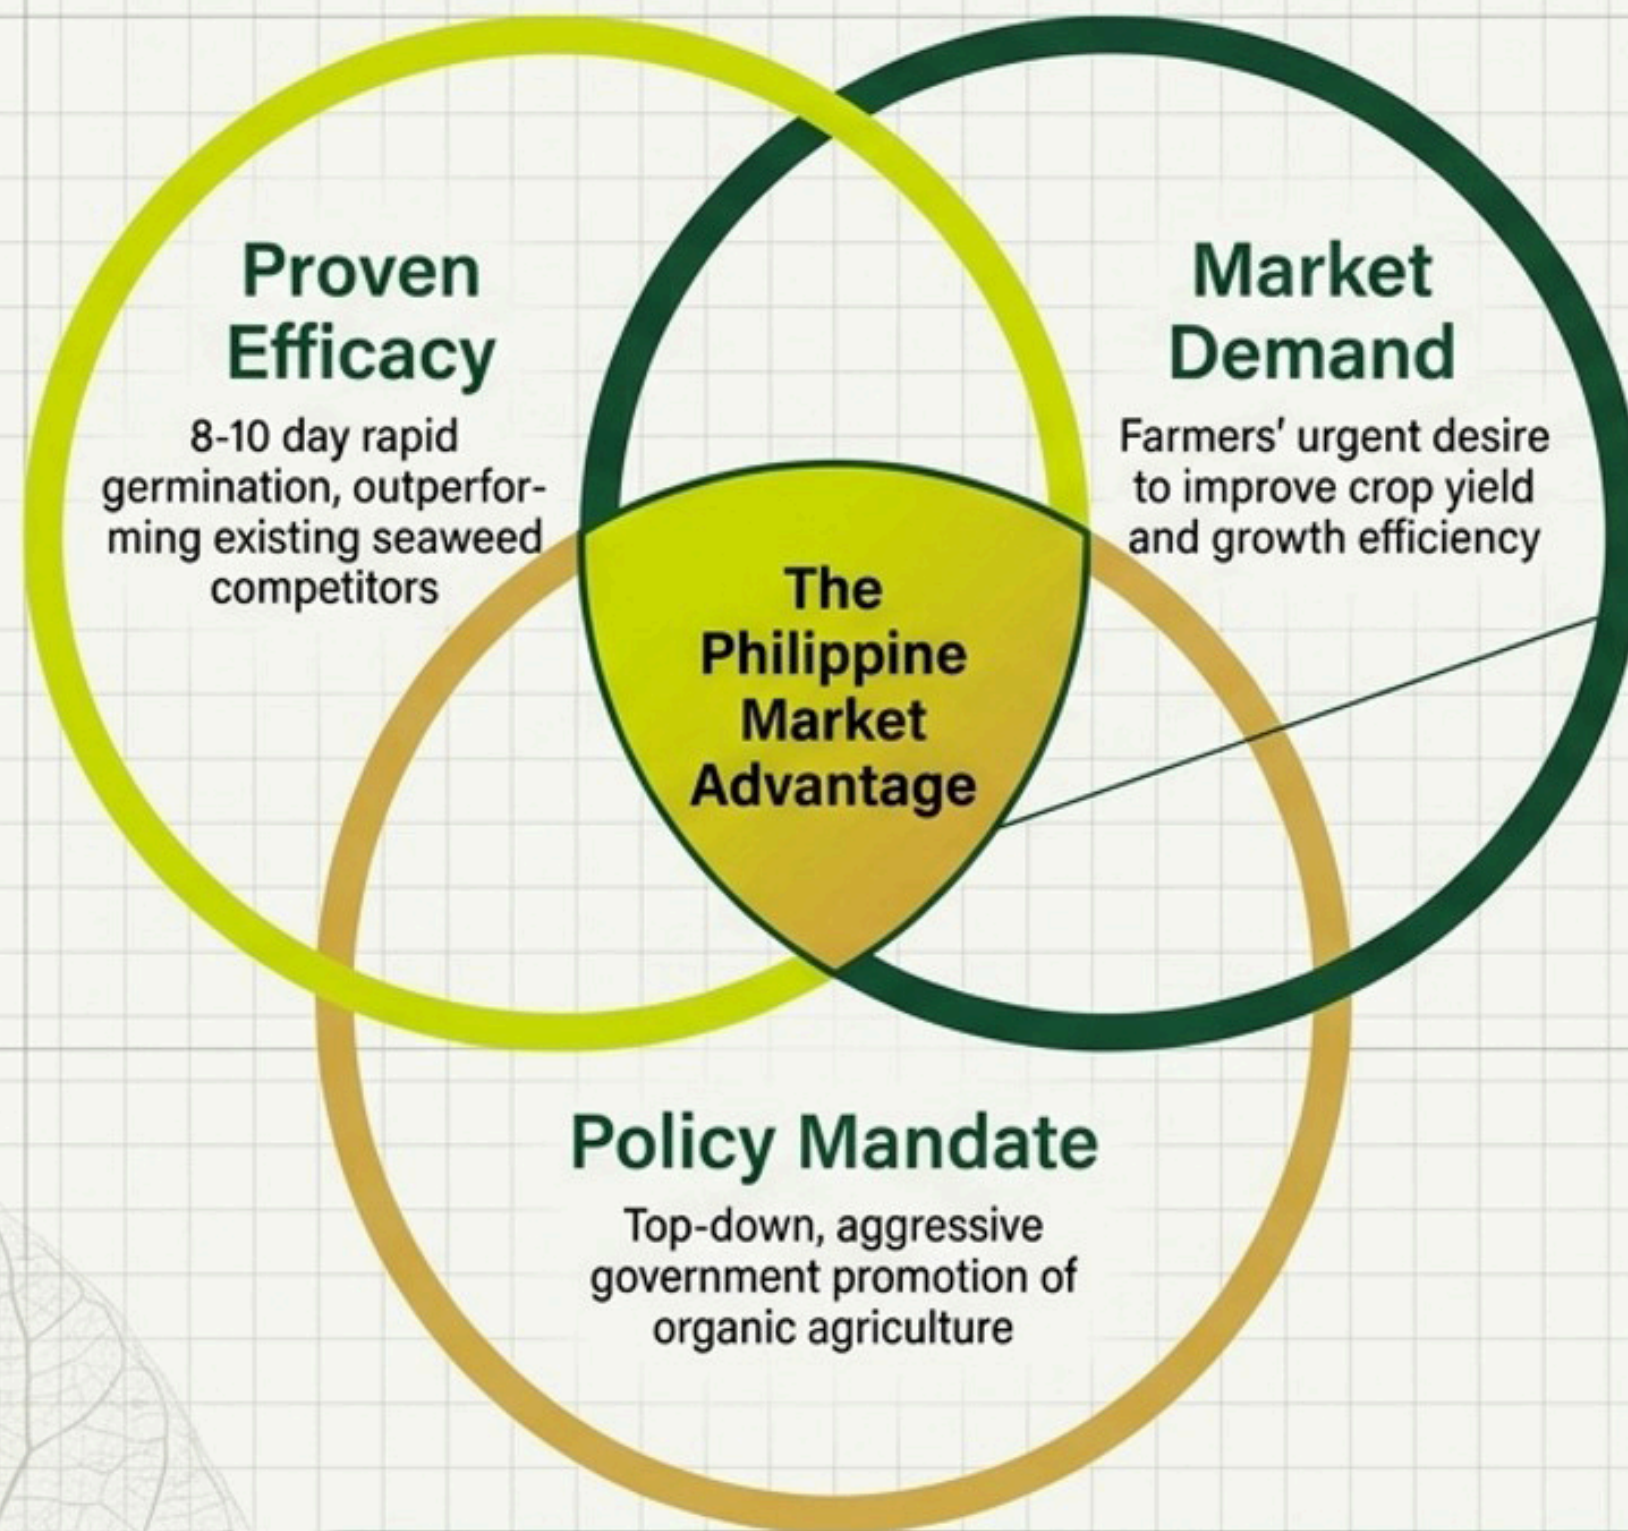

Dimension	Standard Seaweed Competitors	BIO LINK Organic Fertilizer
Active Base	Seaweed Extract	BIO LINK Exclusive Organic Formula
Application	Standard Treatment	High-Efficiency 5-Minute Submersion
Germination Speed	15 Days (Sluggish)	8 - 10 Days (Robust Momentum)
Vegetative Vigor	Average Levels	Visually superior plant height and overall growth vigor compared to control group

The Policy-Driven Golden Window: Philippines Mandates Organic Agriculture

With this policy dividend, introducing BIO LINK to the Philippines guarantees a vast market future.

Strategic Convergence: BIO LINK's Absolute Advantage in the Philippine Market

This successful field validation proves BIO LINK's commercial competitiveness and lays an unshakable foundation for a deep trade partnership. We look forward to capturing this highly lucrative opportunity together.

Play to Win. Partner with Nature.

The future of global agriculture relies on the intersection of biological science and environmental stewardship. **Growing-Up INTL Corp** provides the definitive, zero-compromise solution for sustainable crop management.
